Profile

Junior Software Developer with a **BSc in Computer Science** as a strong technical base and hands-on full-stack development experience through a professional traineeship. My **MSc in Management** helped me develop transferable skills such as teamwork, planning, and communication. Skilled in JavaScript, PHP, React, MySQL, HTML, CSS, WordPress, APIs, AJAX/JSON, and responsive UI design. Delivered several live web applications integrating third-party APIs and secure databases. Graduate visa valid until January 2027 (no sponsorship required). Open to relocation across the UK.

Key Skills

- Frontend: HTML5, CSS3, JavaScript (React), Bootstrap, jQuery, AJAX/JSON
- Backend: PHP, API integration, MVC concepts, RESTful services
- Databases: MySQL, MongoDB, SQL Server
- CMS: WordPress (themes/plugins, Elementor)
- Tools: Git/GitHub, Visual Studio Code, Postman, XAMPP
- Other: OOP, CRUD operations, Unit Testing (PHPUnit), Agile teamwork

Experience & Training

Full Stack Developer Trainee | IT Career Switch, London | 2024 – 2025

- Completed an intensive, practical one-year programme focused on full-stack web development.
- Built and deployed multiple projects from scratch using PHP, MySQL, JavaScript, React, APIs.
- Collaborated with a small team of developers and designers following Agile practices.
- Strengthened debugging, problem-solving, and version control skills in real project settings.

Project Experience

🌐 **Gazetteer Web Application** – [Live Demo](#)

Tech Stack: JavaScript, PHP, Leaflet.js, Bootstrap 5, REST APIs

- Built a **mobile-first web app** showing country profiles with maps, weather, population, currency, and news.
- Integrated **multiple APIs** (OpenWeather, RESTCountries, ExchangeRate, Geonames).
- Designed a **PHP backend** for secure API calls, and added **AJAX** for dynamic data updates.
- Used **Leaflet.js** for maps, markers, clustering, and overlays; tested across desktop and mobile.

Company Directory Management System – [Live Demo](#)

Tech Stack: PHP, MySQL, JavaScript, AJAX, Bootstrap

- Created a **CRUD web app** to manage employees, departments, and locations.
- Added **filters and search** with AJAX for instant updates (no page reloads).
- Designed **responsive UI** with Bootstrap, and **role-based access** for secure usage.
- Gained strong experience working with **databases, JSON, and PHP/MySQL queries**.

Geonames API Data Fetcher – [Live Demo](#)

Tech Stack: JavaScript, PHP, APIs

- Integrated multiple **Geonames APIs** to fetch and display geographical data.
 - Focused on **error handling**, clean UI, and dynamic DOM rendering.
-

Education

MSc Management | BPP University, London | 2023 – 2025

Focused on personal and professional skills such as teamwork, planning, and communication.

BSc Computer Science | Osmania University, India | 2018 – 2021

Graduated with CGPA: 8.51/10. Built strong technical foundation in programming and databases.
